

Trabalhos apresentados pelo LENEP nos Congressos *Society of Exploration Geophysicists (SEG) International Exposition e 83rd Annual Meeting*, em Houston - Texas - Estados Unidos, realizados entre os dias 22 e 27/09.

- Simulating porosity and permeability of NMR log in carbonate reservoirs of Campos Basin – Southeast Brazil - using conventional logs and artificial intelligence techniques;
- Petrophysical, mineralogical and elastic property characterization of Halocene carbonates from Salgada lagoon, Brazil;
- Petrophysical characterization of Halocene carbonates from Salgada lagoon, Brazil;
- Petrophysical, mineralogical and P wave velocity characterization of Albian carbonates from Campos basin, Brazil;
- Estimation of the consolidation parameter on microporous carbonate rocks;
- Dual pore system evaluation of Albian grainstone carbonates from Brazil using effective elastic media theory models.
